

## PRESCOTT 2.25"

**DESCRIPTION:** Wall double-sided **TEXTURE:** Natural stone

### PALLET OVERVIEW

### COMPATIBLE CAPS

See page 103 for product compatibility.

### NOTES

When building a double-sided wall one pallet will cover an average of 25.23 ft<sup>2</sup>.

\* For an authentic look, each color option is composed of a variety of darker & lighter tones. Natural ingredients such as granite are present within the recipe to allow for a range in tones, veining and textures from one stone to another.

The dimensional tolerance for Stonedged wet cast retaining wall units is:  $\pm \frac{3}{16}$ " (5 mm) for height and  $\pm \frac{1}{2}$ " (13 mm) for length and width. During the installation, the level between adjacent wall units will vary (usually more than for a dry cast wall unit) in order to obtain a more realistic appearance of a natural stone wall.

See page 99 to 119 for more technical information.

# PRESCOTT RETAINING WALL – LAYING PATTERNS

The different modules of the Prescott retaining wall allow the installation of different block combinations. Eight combinations are shown as an example. Each combination is 24" (610 mm) long and 6 3/4" (171 mm) high.

The wall installation will be facilitated if the height of the wall is calculated in multiples of 6 3/4" and the length in multiples of 24".

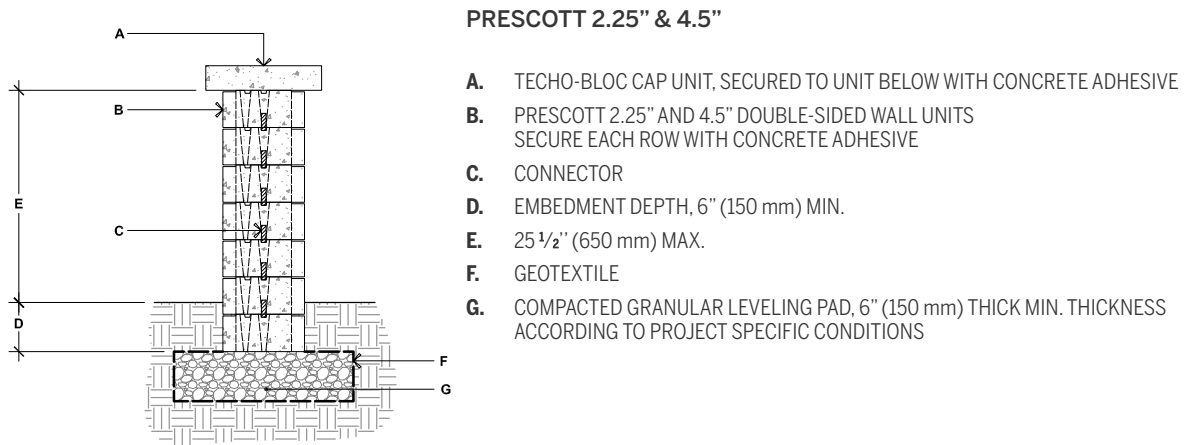

Percentage of blocks required  
Prescott 2.25": 33 % of the surface  
Prescott 4.5": 67 % of the surface
